AIM portfolio service

The AIM portfolio service is specifically designed to mitigate a potential Inheritance Tax (IHT) liability. This is achieved by investing in a discretionary portfolio of AIM companies, managed by a dedicated and specialist team, that qualify for Business Relief.

Shares in AIM companies are treated as unquoted for tax purposes, meaning that investors can benefit from Business Relief and obtain 100% relief from IHT provided that the shares have been held for a total period of no less than two years at the date of death. The service is a relatively simple, cost-effective and quick means of reducing IHT whilst providing growth potential and access to capital.

Investment strategy

Evelyn Partners applies a disciplined investment process focusing on high-quality, resilient companies with more defensive characteristics than the wider AIM Index. To reduce stock specific risk, we seek to hold a minimum of 25 companies from a variety of sectors, selected for their long-term potential and target companies with a minimum market capitalisation of £100 million. We carry out our own research and meet the management of each company before investing.

About us

At Evelyn Partners our mission is 'to place the power of good advice into more hands'. As experts in wealth management since 1836, we look after our global clients from offices across the UK, Republic of Ireland and Channel Islands. We're proud that many financial advisers choose us to manage their clients' wealth too. That's because our advice is delivered by people who care, who go further to understand the adviser's needs and those of the client, ensuring that we provide investment solutions that are right for you. That is the power of good advice.

Discrete annual performance to 29 February 2024

1 Year (%) to the end of	Feb 24	Feb 23	Feb 22	Feb 21	Feb 20
AIM Composite *	-7.6	-13.0	1.4	18.2	2.1
Deutsche Numis Alternative Market	-13.3	-17.3	-9.7	36.0	-1.9

Investment commentary

February saw the AIM market continue to digest the strong 2023 year-end rally, with some names consolidating their gains and others subject to some profit-taking. Undoubtedly there was a degree of apprehension looking towards the Budget on 6th March. Whilst there had been much speculation regarding possible changes to the Inheritance Tax (IHT) regime or to Business Relief (the mechanism that zero-rates AIM stocks for IHT). In the end Jeremy Hunt did not announce any changes, to a collective sigh of relief. There remains speculation that changes to IHT may have been held back for a final pre-election announcement in the Autumn or potentially as a manifesto promise. We will watch this space closely. In the meantime, economic data continues to point towards inflation dropping, but with a potential re-acceleration in the second half of the year. However, this does not seem to have impacted the consensus view that we will see cuts in interest rates this year. This outlook continues to be supportive for smaller companies, and with potential interest in AIM being driven by the newly announced "British ISA" and the renewed commitment from Jeremy Hunt for UK pension funds to invest in unquoted UK companies (which would include AIM), we do see this as further fuel for the ongoing recovery in share prices.

Important Information

AIM shares are likely to be high risk and volatile. Their value, and the income arising from them, may go down as well as up, and there is the possibility that investors could lose their entire investment. Past performance is not a guide to future performance. The listing requirements and rules for AIM shares are less demanding than those on the main market of the London Stock Exchange. AIM shares can suffer from partial or total illiquidity, which may make it difficult, or impossible, to dispose of a holding. It is not always possible to deal for all clients at the same time or price.

The tax treatment depends on the financial circumstances of each client. The benefits of the service are premised on current tax rules and the tax relief available may change at any time. The AIM Portfolio Service should be regarded as a higher risk, long-term investment and may not be suitable for all investors. You should only invest if you have financial security independent of any investment. We recommend that investors seek independent investment and tax advice. Investments are made on a 'best endeavours' basis, Evelyn Partners cannot guarantee that any investment will qualify, or continue to qualify, for Business Relief and gain exemption from Inheritance Tax. Any cash held at the date of death will not qualify for Business Relief. Evelyn Partners does not guarantee the timescale for fully investing portfolios or that portfolios will be fully invested at all times.

There can be no assurance that any portfolio will achieve its investment objective. This factsheet does not constitute personal advice and is not promoting the service. Anyone considering using the service should seek financial advice.

* The AIM Composite is defined as portfolios managed by the AIM Team, that are discretionary and have an AIM mandate. There are currently 246 portfolios in the composite. Individual client returns will differ from the Composite depending upon the timing of the investment and the individual stocks selected. The AIM Composite and the Deutsche Numis Alternative Markets Index is calculated on a gross of management fees basis. The effect of fees and charges would be to reduce the overall value of the portfolio. Index data is calculated on a total return basis, i.e. including dividends reinvested. ** Inception date is 30 June 2006.
